ELECTION DASHBOARD

OPEN DASHBOARD

WELCOME TO THE SANEF ELECTION DASHBOARD

Visit the SANEF Election Dashboard and get acquainted with it

The Election Dashboard is available at elections.sanef.org.za/dashboard. The landing page contains a brief video introduction to the dashboard.
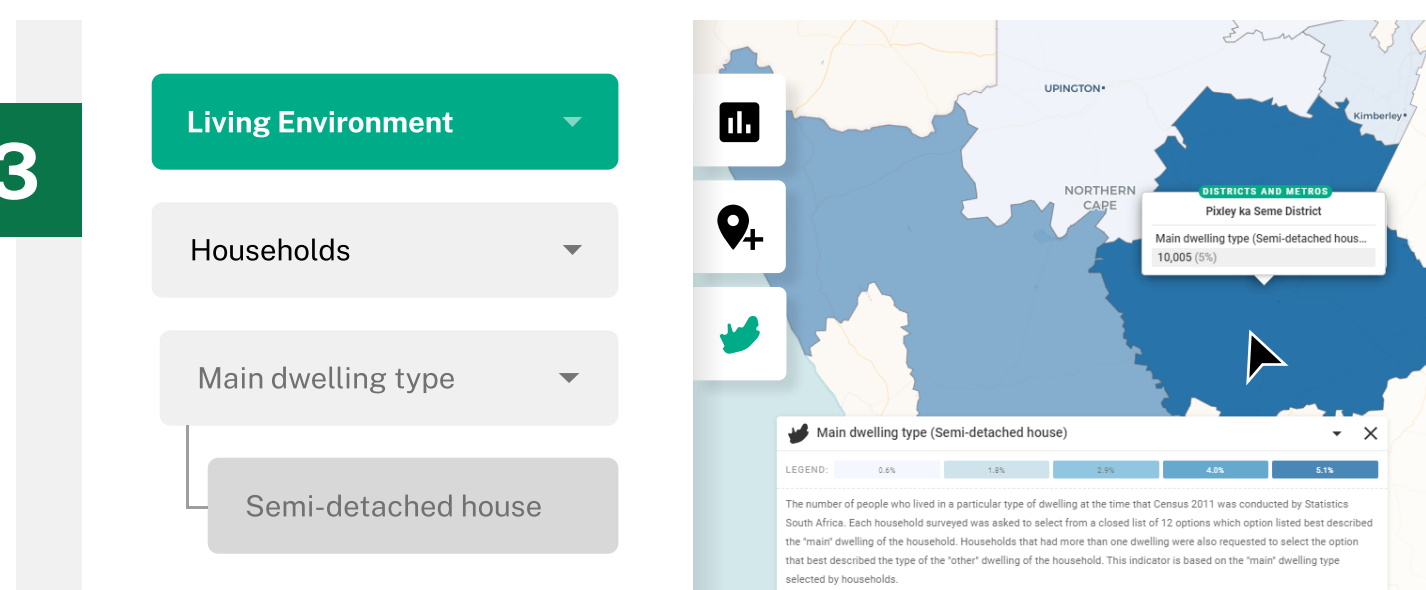

2

Elections

Demographics

Living Environment

Economic Environment

Explore the datasets that are available on the dashboard

Amongst others, the dashboard includes data pertaining to elections, municipal finance and demographics. The dashboard also comes with three different ways to view the data.
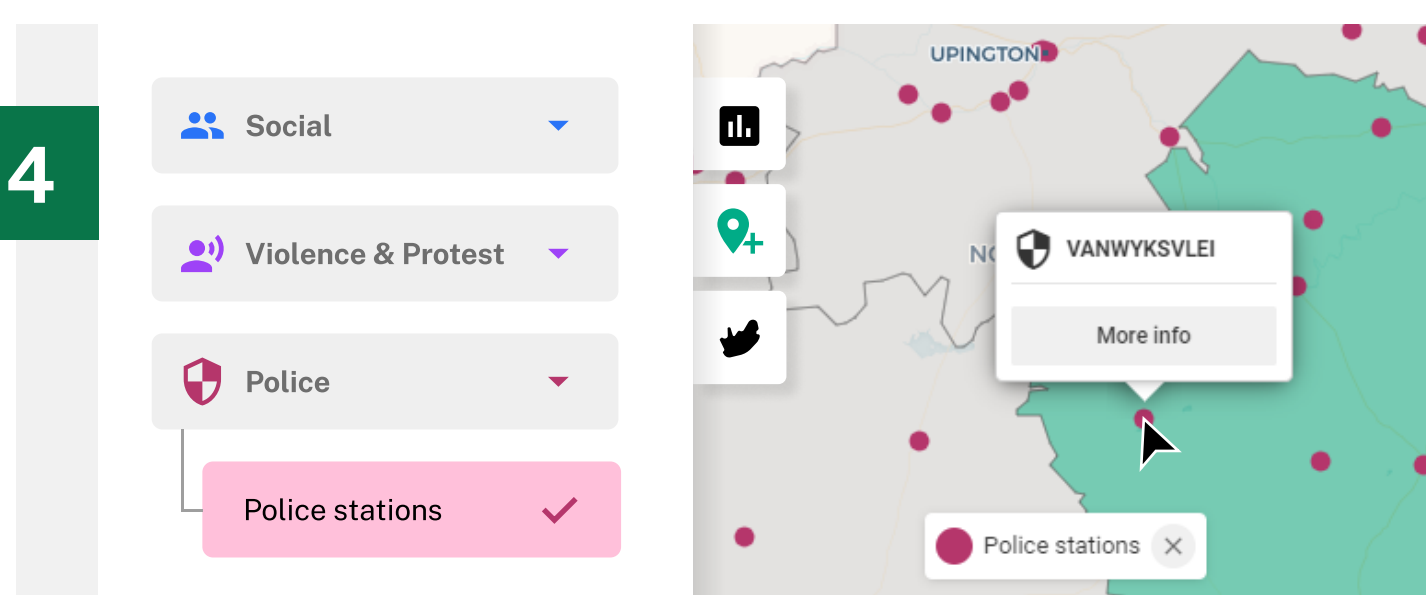

3

Living Environment

Households

Main dwelling type

Semi-detached house

Explore the data mapper view

This view provides a graphic representation of the various datasets for a selected geographical location. It's particularly useful for comparing data across different provinces, municipalities or even wards.

4

Social

Violence & Protest

Police

Police stations

VANWYKSVLEI

More info

Police stations

Explore the point mapper view

This view uses GPS coordinates to map point data. Once a point is selected, more information about that particular point can be viewed. The utility of this view lies in its ability to show the geographic spread of particular data, for example where protests have taken place.

5

Demographics

Population (2016 Community Survey)

Age - broad age groups

Select an attribute   Select a value

Add new filter +

MUNICIPALITY
Hantam

Explore the rich data view

This view shows all available data for a selected geographical location in chart and table format. This is best for seeing all available for a chosen geographical location in one place.
